Third giCASES Dissemination Seminar/Workshop

Case-based collaborative learning: an innovative approach to university-business cooperation

31st May 2017

Forestry Museum, Sopron

giCASES is a Knowledge Alliance project under the Erasmus+ programme of the European Commission. The project aims to enable and strengthen innovation in GI education and industry and to facilitate the collaborative creation, management and sharing of knowledge. These objectives are addressed by developing new, innovative and multidisciplinary approaches to teaching and learning within the Geographic Information (GI) sector, and by facilitating the exchange, flow and co-creation of this knowledge.

Objectives of the event

The seminar will bring together representatives from the consortium partners; representatives from universities and private companies active in the geospatial field, similar projects and other organizations.

The objectives of the event are:

- To present different perspectives on university-business cooperation in teaching and learning including insights and views from academia, private companies and representatives from other EU initiatives;
- To exchange ideas on the approach to university-business cooperation and how to promote innovation in the field;
- To present the giCASES approach on case-based collaborative learning and co-creation of knowledge in the geospatial sector;
- To exchange ideas on strengths and opportunities for project exploitation, sustainability and impact in the medium and long term, identify main barriers and propose solutions (what, how, by whom, when).

Venue

Forestry Museum (Erdészeti Múzeum, Templom utca 4, Sopron, HU)

For more information, see: <http://www.erih.net/i-want-to-go-there/site/show/forestry-museum/>

Time

Wednesday 31st May 2017, 9:30-15:00

Registration

By sending an e-mail to czimber.kornel@uni-sopron.hu indicating your name and affiliation
